### LED Technology

This LED Street & Parking Lot Light is often used to replace halogen style lights in parking lots, commercial plazas, warehouse exteriors, university campuses, city centers, tennis courts, and public gardens. This product comes with an outdoor-rated LED chip manufactured by Philips which provides stable color consistency. The built-in heat sink provides heat management, allowing for a lifespan of over 50,000 hours. Waterproof with strong aluminum housing, The LED Street & Parking Lot Light is built for durability and has several mounting options. Optional features such as motion and daylight sensor controls are also available.
