PRODUCT DESCRIPTION

This LED Area Flood Light series is often used to replace halogen style lights in commercial plazas, community parks, university campuses, city centers, tennis courts, and public gardens. This product comes with an outdoor-rated LED chip providing stable color consistency as well as a built-in heat sink which provides heat management, allowing for a lifespan of over 50,000 hours. Waterproof with strong aluminum housing, The LED Area Flood Light is built for durability. Optional features such as motion and daylight sensor controls are also available.
