LED Vapor Tight Light

LOT-VP-40-6/LOT-VP-50-6

Product Number	LOT-VP-40-6/LOT-VP-50-6
Lumen Output	4,600 - 5,750
Wattage	40W -50W
Lumen Efficacy	115lm/w
CCT	3000K - 4000K - 5000K
Dimensions	50 1/8" x 3 4/8" x 5 4/8" x 4 3/8"
Input Voltage	UNV = Universal 120-277 VAC HV = 347 VAC & 480 VAC
IP Rating	IP66
LED Driver	Class II driver, with 0-10V or triac dimming
Certification	UL, DLC, FCC, ISO

Product Description

The LED Vapor Tight Light provides energy-efficient lighting designed for environments which require a water-tight seal such as gas stations, parking garages, refrigerated storage centers, restaurant freezers, supermarkets, car washes, and various industrial warehouses. The water-tight, gasketed seal and tamper resistant mounting clips make this fixture ideal for wet locations and an excellent replacement for outdated fluorescent lights. Available in a variety of color temperatures, this fixture has a Class II driver with 0-10V or Triac dimming and has high quality LED chips which maintain efficiency, heat dissipation, stability, and lumen output.
